EFBQ85R Product Data Sheet

Issue Date: 01/11/2026 · Issued By: Aurion Batteries

ENHANCED FLOODED BATTERY · 12V AUTOMOTIVE

Technical Information

The Aurion EFBQ85R is a 12V Aurion Enhanced Flooded Battery (EFB) designed for vehicles with idle stop-start systems. EFB technology builds on flooded battery design to handle the frequent engine restarts and partial state-of-charge operation that stop-start driving demands.

	LENGTH MM	WIDTH MM	HEIGHT MM

Features and Benefits

- Designed for idle stop-start vehicles
- Built for repeated restarts in stop-start driving
- Improved cycling over a conventional flooded battery
- Handles partial state-of-charge operation
- 560 cold cranking amps

Common manufacturers that use this battery
Subaru
Lexus
Toyota

7 vehicle listings in the Aurion fitment guide.

How EFB technology works

Stop-start vehicles switch the engine off at idle and restart it many times per trip, so the battery spends more time partly charged and cycles far more than in a conventional vehicle. An Enhanced Flooded Battery is a strengthened version of the flooded design, built to cope with this cycling and partial state-of-charge use better than a standard flooded battery. Always replace with the battery technology the vehicle manufacturer specifies.

Technical Specifications

Technology	Enhanced Flooded Battery (EFB)	**Voltage**	12 V
Cold Cranking Amps	560 CCA	**Capacity (20hr rate)**	60 Ah
Reserve Capacity	120 min	**Overall Dimensions**	230 × 172 × 200 mm (L×W×H)
Weight	15.8 kg	**Terminal Layout**	Positive left (viewed from front)
